

SlimIoT Evidence Repository Module

Product Requirements Document (PRD)

Purpose

The Evidence Repository is a centralized knowledge base that captures, organizes, and reuses evidence generated from all SlimIoT pilots. Its purpose is to transform pilot data into a strategic asset for sales, clinical validation, product development, investor discussions, and regulatory readiness.

Business Objectives

Create institutional memory, accelerate sales cycles, support clinical publications, build investor confidence, and establish a proprietary evidence moat around SlimIoT products.

Scope

Store anonymized pilot outcomes, participant statistics, device performance data, testimonials, reports, case studies, publications, and derived insights.

Core Screens

Evidence Dashboard

Summary of pilots completed, participants monitored, monitoring nights, device uptime, and evidence assets.

Evidence Library

Searchable repository of pilot reports, case studies, publications, testimonials, and datasets.

Pilot Findings

Structured storage of pilot outcomes, observations, lessons learned, and recommendations.

Clinical Insights

Aggregated sleep, wellness, and physiological trends across pilots.

Sales Evidence Hub

Quick access to outcome metrics, testimonials, and ROI stories for business development.

Research Portal

Supports academic collaboration and publication tracking.

Database Schema

EvidenceAsset

- id
- title
- type
- description
- created_date
- source_pilot_id
- tags

PilotFinding

- id
- pilot_id
- finding_type
- finding_summary
- significance_level

Testimonial

- id
- source_type
- quote
- attribution

Publication

- id
- title
- authors
- publication_date
- link

EvidenceMetric

- id
- metric_name
- metric_value
- pilot_id
- benchmark_group

Search & Retrieval Features

Filter evidence by product, organization type, geography, participant type, device version, metric, date range, and outcome category.

Reporting Requirements

- Evidence Summary Report
- Product Validation Report
- Clinical Findings Report
- Sales Enablement Pack
- Investor Due Diligence Pack
- Regulatory Evidence Dossier

AI & Analytics Roadmap

- Automatically generate pilot summaries.
- Identify recurring findings across pilots.
- Benchmark sites and cohorts.
- Generate investor-ready evidence packs.
- Answer natural-language questions such as 'Show all pilots where sleep efficiency improved by >10%.'
- Recommend the strongest evidence assets for a given sales opportunity.

Strategic Value

The Evidence Repository becomes SlimIoT's long-term intellectual property layer. While devices and dashboards can be replicated, a curated evidence base accumulated across years of pilots creates a defensible competitive advantage.
